

7NOX v3.0 Release Notes

AUCKLAND, 1st May 2023 — OpSys Solutions Ltd has announced a major update to its after-hours HVAC scheduling platform 7NOX. Version 3.0 adds support for Niagara 4[®] users along with major enhancements to the backend and frontend.

Back end: New Application Framework

7NOX now runs on the **ASP.NET Core / .NET 6** web application framework developed by Microsoft. Benefits include:

- Enhanced Backend Performance
- Better Security
- Cross-platform Support
- Easier Maintenance

Front end: Update to Angular 14

The move from Angular 8 to Angular 14 brings:

- Enhanced Performance
- Enhanced Security and Bug fixes
- UI Improvements and Bug Fixes

The 7NOX app is a cloud-based web app that automates the scheduling after-hours HVAC requests. OpSys Solutions Ltd is a hardware and software developer of building integration products.
